

NAF's Academy of Finance connects high school students with the world of financial services, offering a curriculum that covers entrepreneurship, banking and credit, financial planning, international finance, securities, insurance, accounting, and economics, among other topics.

HISTORY AND IMPACT

The NAF Academy of Finance (AOF) was NAF's first career theme and was launched in 1982 in New York to prepare high school students for careers in the rapidly growing finance industry. Today, there are 209 NAF Academies of Finance in 117 school districts across 32 states, including the US Virgin Islands. They serve more than 23,000 students annually, 63% of whom are from low-income families (determined by eligibility for free and reduced price lunch). Longstanding partnerships with Citi, American Express, and many other companies ensure that AOF students are at the vanguard of financial education and reap the benefits of work-based learning opportunities.

CURRICULUM

The AOF curriculum is vetted by partners in the financial services and business sectors, and emphasizes literacy and project-based learning to engage students. AOF students begin with Principles of Finance to gain a broad understanding of the core concepts needed in this field. Academies introduce students to a wide array of careers through courses including Applied Finance, Business Economics, Business in a Global Economy, Entrepreneurship, Ethics in Business, Financial Planning, Financial Services, Insurance, Managerial Accounting, and Principles of Accounting. Academy students will have completed at least four NAF courses by graduation.

AOF graduates benefit from learning the critical concepts of business management, accounting, and ethics.

COLLEGE AND CAREER READINESS

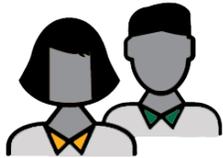

In addition to studying career-focused curriculum and working on collaborative projects, AOF students gain critical career knowledge through a series of work-based learning activities both inside and outside of the classroom. These activities include job shadowing, mock interviews, résumé writing workshops, and a paid internship. Local business partners work with educators to provide these opportunities and round out students' education. By serving on advisory boards and as mentors, business partners provide a real world connection to academy coursework that helps students understand the pathways to career success.

NAFTrack Certification, NAF's student certification assessment system, validates successful course completion, projects, and internships. By receiving a passing score on end-of-course exams and satisfactory scores on culminating project and internship assessments, students earn NAFTrack Certification, signifying to post-secondary institutions and employers that they are both college and career ready. With this credential, graduates can benefit from NAFTrack Certified Hiring, a commitment made by several of America's top companies to give special consideration to qualified college students and eventual job applicants.

Graduates of NAF academies complete college faster, earn more, and have stronger ties to their communities than their peers. NAF's 98% senior graduation rate is a testament to this effort.

From 2012-2022, the Bureau of Labor Statistics estimates almost 900,000 new business and financial operations jobs will be created. In particular, 167,000 jobs will be added in the accounting and auditing professions - the largest projected growth of any business or financial operations occupation.
